How To Use This BRD

1. Answer each question in the box under it. Where there is a dropdown, pick an answer or type your own, then add detail in the box beside it. Attach examples, forms or sheets where a question asks for them.
2. Tick the priority for each requirement: Must have for go-live, Nice to have for a later phase, or Not needed.
3. Leave a question blank if it does not apply or you are not sure. We go through open points together in the workshop.
4. Each question has a code (for example LD-03) so everyone can refer to the same requirement in emails and meetings.
5. When it is complete, the signed BRD becomes the agreed scope for the implementation.
